PROJECTS

FlashCV – A web based resume builder

Live Link : <https://flashcv.vercel.app> Github Link : <https://github.com/hrpofficial736/flashcv-client>

FlashCV is a fast and intuitive resume builder web app designed to help users create professional resumes with ease. Built with a clean UI and customizable templates, FlashCV allows users to input their details and instantly generate downloadable, well-formatted resumes. Ideal for job seekers and students, it simplifies the resume creation process and ensures a polished final product.

resQ – A weather alert mobile app

Github Link : <https://github.com/hrpofficial736/resq>

resQ is a comprehensive mobile application designed to enhance user safety during adverse weather conditions. It provides real-time weather updates, temperature, air quality index (AQI), and location-based alerts. resQ also features nearby shelter listings, emergency SOS functionality, and a clean, intuitive interface. The app aims to assist users in making informed decisions and staying safe during natural emergencies and disasters.

Sociogram – A social media mobile app

Github Link : <https://github.com/hrpofficial736/sociogram>

Sociogram is a modern mobile social networking app that enables users to connect, share posts, follow others, and engage through likes and comments. Designed with a smooth and responsive UI using Flutter, it offers real-time updates, secure authentication, and a feed-based layout to deliver an engaging social experience on mobile.

BlogVerse – A simple web based blogging app

Live Link : <https://blogverse-sigma.vercel.app>

Github Link : <https://github.com/hrpofficial736/blogverse-client>

BlogVerse is a minimal and elegant blogging website where users can publish, read, and manage blog posts seamlessly. The platform supports rich text editing, user authentication, and a clean content management interface, making it perfect for writers and readers who value simplicity and functionality.
